# E.A.6.8 (Graph Colouring with Red Self-Loops)

#### 1.1 Modellazione

Dati i parametri G = (V, E) siano

- $\mathcal{C} = \{R, B, C\}$
- $X = \{X_v^c \mid v \in V \land c \in \mathcal{C}\}$ l'insieme di variabili dove
  - $X_v^c$  è vera se il nodo v ha colore c

Il problema presenta 4 vincoli

$$\phi = \phi_1 \wedge \phi_2 \wedge \phi_3 \wedge \phi_4 \tag{1}$$

(ALO) Ogni nodo ha almeno un colore

$$\phi_1 = \bigwedge_{v \in V} \bigvee_{c \in \mathcal{C}} x_v^c \tag{2}$$

(AMO) Ogni nodo ha al più un colore

$$\phi_2 = \bigwedge_{\substack{v \in V \\ c_1, c_2 \in \mathcal{C} \\ c_1 < c_2}} X_v^{c_1} \to \neg X_v^{c_2} \tag{3}$$

1. Non esistono nodi collegati da un arco colorati con lo stesso colore.

$$\phi_3 = \bigwedge_{\substack{(u,v) \in E \\ c \in \mathcal{C} \\ u \neq c}} X_u^c \to \neg X_v^c \tag{4}$$

2. Ogni nodo  $v \in V$  che ha un cappio (un arco da v a v) è colorato con il colore R.

$$\phi_4 = \bigwedge_{(v,v)\in E} X_v^R \tag{5}$$

### 1.2 Istanziazione

## 1.2.1 Variabili

```
\begin{split} V &= \{ \text{A, B, C, D, E, G1, G2, H, I, J, S} \} \\ E &= \{ \\ &\quad (\text{A, E}), (\text{E, A}), (\text{A, H}), (\text{H, A}), (\text{A, I}), (\text{I, A}), (\text{A, S}), (\text{S, A}), (\text{B, C}), (\text{C, B}), \\ &\quad (\text{B, G2}), (\text{G2, B}), (\text{B, I}), (\text{I, B}), (\text{B, J}), (\text{J, B}), (\text{B, S}), (\text{S, B}), (\text{C, D}), (\text{D, C}), \\ &\quad (\text{C, G2}), (\text{G2, C}), (\text{C, S}), (\text{S, C}), (\text{D, E}), (\text{E, D}), (\text{D, S}), (\text{S, D}), (\text{E, G1}), (\text{G1, E}), \\ &\quad (\text{E, H}), (\text{H, E}), (\text{G1, H}), (\text{H, G1}), (\text{G2, J}), (\text{J, G2}), (\text{H, I}), (\text{I, H}), (\text{J, J}) \\ \} \end{split}
```

$$X = \left\{ \begin{array}{c} X_{\rm A}^{\rm R}, X_{\rm A}^{\rm B}, X_{\rm A}^{\rm C}, X_{\rm B}^{\rm R}, X_{\rm B}^{\rm B}, X_{\rm C}^{\rm C}, X_{\rm C}^{\rm R}, X_{\rm C}^{\rm B}, X_{\rm C}^{\rm C}, X_{\rm C}^{\rm R}, X_{\rm C}^{\rm B}, X_{\rm B}^{\rm C}, X_{\rm C}^{\rm R}, X_{\rm C}^{\rm B}, X_{\rm C}^{\rm C}, X_{\rm C}^{\rm R}, X_{\rm B}^{\rm B}, X_{\rm A}^{\rm C}, X_{\rm C}^{\rm R}, X_{\rm C}^{\rm B}, X_{\rm C}^{\rm C}, X_{\rm C}^{\rm R}, X_{\rm C}^{\rm B}, X_{\rm C}^{\rm C}, X_{\rm C}^{\rm R}, X_{\rm B}^{\rm B}, X_{\rm C}^{\rm C}, X_{\rm C}^{\rm R}, X_{\rm B}^{\rm B}, X_{\rm C}^{\rm C}, X_{\rm C}^{\rm R}, X_{\rm C}^{\rm B}, X_{\rm C}^{\rm C}, X_{\rm C}^{\rm R}, X_{\rm C}^{\rm B}, X_{\rm C}^{\rm C}, X_{\rm C}^{\rm R}, X_{\rm C}^{\rm B}, X_{\rm C}^{\rm C}, X_{\rm C}^{\rm R}, X_{\rm C}$$
